

The following is a schedule of the work currently being undertaken by Plant Import teams in the Plants, Food & Environment Directorate. Completion is subject to review in accordance with the MPI prioritisation process.

Standard	Programme	New standard or review	Current status* subject to change	Next process* subject to change
152.02: Importation and Clearance of Fresh Fruit and vegetables into New Zealand	Australian Fruit Fly Review	Review	Ongoing	Review and agree an Export Plan
	Table Grapes – irradiation measure	Equivalence	Review of submissions	Issue Final Draft
	<i>Citrus</i>	New	Scoping	Risk assessment
	<i>Egyptian Citrus Review</i>	Review	Consultation	Review of submissions
	Ginger	New + Review	Scoping	Risk assessment
	Mango	Review + Equivalence	Pre-consultation draft	Prepare draft for public consultation
	Polynesian Plums (Pacific Programme)	New	Draft in preparation for public consultation	Consultation
	Capsicums	Equivalence + Review	Draft in preparation for public consultation	Consultation
	Pineapples (Pacific Programme and other countries)	New + Review	Risk Assessment	Pre-consultation draft
	Pumpkins (<i>Cucurbita pepo</i>) for ornamental purposes (Pacific Programme)	New	Draft in preparation for public consultation	Consultation
	Table grapes – review and India	New + Review	Risk Assessment	Pre-consultation draft
155.02.04: Import Health Standard for Cut Flowers and Foliage	Review and amalgamation of Cut Flowers and Foliage IHS with <i>Cordyline</i> & <i>Draceana</i> Branches and Foliage IHS.	Review	Scoping	Risk assessment
	<i>Oncidium</i>	New	Review of submissions	Issue Final Draft
	Malaysian Phytosanitary Certification Scheme for Cut flowers and Foliage	Equivalence	Assessment	Pre-consultation draft
IHS for Phase 3 mushroom growing medium	Development of specific measures for Phase 3 mushroom growing media	New	Review of submissions	Issue Final Draft
IHS for mushroom propagative material	Review biosecurity risks associated with mushroom spawn and inoculated products and develop a new IHS (spawn and inoculated products currently imported under MICROIC.ALL).	New	Delayed	Risk assessment
155.02.06: Importation of Nursery Stock	<i>Citrus</i> spp. (lemon, lime, orange, kumquat, trifoliolate orange) dormant cuttings and tissue culture from all countries – includes <i>Fortunella</i> (kumquat) and <i>Poncirus</i> (trifoliolate orange).	Review	Delayed	Targeted consultation on IHS in new format
	<i>Persea</i> (avocado) cuttings and seed from all countries – review of pest list and phytosanitary requirements	Review	Delayed	Public consultation
	<i>Humulus</i> (hops) – rhizomes, tissue cultures and seeds from all countries - review of pest list and phytosanitary requirements	Review	Delayed	Public consultation
	<i>Vaccinium</i> tissue culture – review of import requirements, including eligibility for import into Level 3A PEQ facilities	Review	Issued as Final	
	<i>Actinidia</i> (kiwifruit) tissue culture from all countries	New	Pre-consultation draft	Public consultation
	<i>Pelargonium/Geranium</i> – review of measures and offshore facility assessment	Review +	Delayed	Risk assessment

The following is a schedule of the work currently being undertaken by Plant Import teams in the Plants, Food & Environment Directorate. Completion is subject to review in accordance with the MPI prioritisation process.

Standard	Programme	New standard or review	Current status* subject to change	Next process* subject to change
	<i>Fragaria</i> spp. – review of emerging risks	Review +	Scoping	Risk assessment
155.02.06: Importation of Nursery Stock	<i>Dickeya solani</i> in imported Hyacinth bulbs	New	Delayed	Pre-consultation draft
	Review of emerging risks on potato nursery stock pathway	Review	Targeted consultation	Issue Final Draft
	Review of alternatives to dicofol miticide treatments in nursery stock: <i>Tricyrtis</i> , <i>Calanthe</i> , <i>Dahlia</i> , <i>Gentiana</i> , <i>Hydrangea</i> , <i>Verbena</i>	Review	Risk assessment	Targeted consultation
	Phytoplasmas in ornamental nursery stock	Review	Delayed	Pre-consultation draft
	<i>Phytophthora</i> spp. (other) in imported nursery stock	Review	Delayed	Pre-consultation draft
	<i>Xylella fastidiosa</i> in imported nursery stock (tissue cultures)	Review of emergency measures	Scoping	Risk analysis
155.02.05: Seeds for Sowing	<i>Citrus</i> spp. (lemon, lime, orange, kumquat, trifoliolate orange) seeds from all countries – includes <i>Fortunella</i> (kumquat) and <i>Poncirus</i> (trifoliolate orange).	Review	Delayed	Risk analysis
	Measures for pelleted and coated seeds	Review	Delayed	Risk assessment
	<i>Lolium/Festuca</i> seed – update pest list for <i>Rathayibacter</i> and <i>Anguina</i>	Review	Pre-consultation draft	Public consultation
	Pea seed for sowing – review of treatments for pea seed weevil	Review	Issued as Final	
	Apiaceae seed for sowing – review of treatments for Lso	Review	Issued as Final	
	<i>Myrtaceae</i> seed for sowing – management of fungal pathogens	New	Drafting	Targeted consultation
	<i>Zea mays</i> – review of emergency measures for Maize lethal necrosis disease	Review	Delayed	Pre-consultation draft
	<i>Glycine</i> – review of measures for <i>Peronospora manshurica</i>	Review	Delayed	Risk assessment
PEQ Standard Updates	PEQ Standard updates.	Review	Scoping	Drafting
BNZ-PAFP-IMPRT: Importing Processed Animal Feeds of Plant Origin	Review of the current standard and update into new MPI format.	Review	Risk assessment	Pre-consultation draft
BNZ-GCFP-PHR: Grains/Seeds for Consumption, Feed and Processing	Review of the current standard and update into new MPI format.	Review	Pre-consultation draft	Public consultation
	Review of the schedules for <i>Zea</i> (corn) and <i>Triticum</i> (wheat)	New	Pre-consultation draft	Public consultation
MPI-STD-WPACK Wood Packaging from All Countries	Review of the current standard to align with revised ISPM 15 and update into new MPI format.	Review	Pre-consultation draft	Public consultation
IHS for Timber Products	Review of the current import requirements for Sawn Wood and Poles, Piles, Rounds and Sleepers (including railway sleepers) and update into new MPI format. This includes reviewing treatment requirements, including options for heat treatment, methyl bromide, phosphine, ethanedinitrile (EDN), and other chemical treatments.	Review	Risk assessment	Pre-consultation draft
Fresh Plant Material for Research, Analysis and Testing for all countries	Removing and reviewing the measures in the current Plant Products IHS and putting these into a new IHS	New	Pre-consultation draft	Public consultation
